How do you rate?

In this time of uncertainty, the need to be in absolute control of your organisation's performance **is more important than ever**. How in control are you?

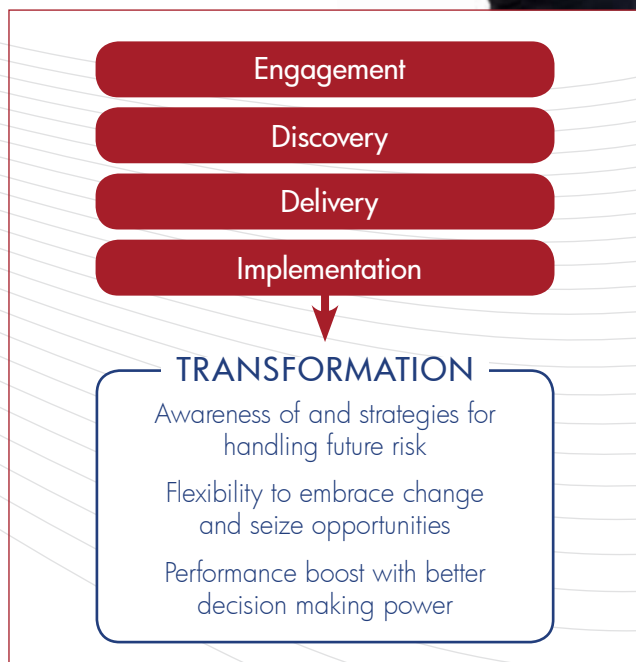

If any of the following statements are **not true** for your enterprise, we can help close the gaps and improve your competitive advantage

- Check through this list:
- Can you simultaneously check the impact of **multiple** factors on **all key areas** of your future business - factors such as: interest rate changes, pay increases, inflation, cost movements, inventory level changes, exchange rate movements etc.?
- Can you readily compare alternative scenarios?
- Do you have analytical reporting capabilities that can explore the future as well as the past?
- Do your short-term annual budgets mesh with your longer-term plans?
- Does your annual budgeting cycle take less than 6 weeks from start to finish?
- Can you complete your normal month-end reports within 5 days of the end of the month?
- Do you have "a single version of the truth"? That is - are your information sources integrated so that they have common, over-riding definitions and with no inter-source contradictions?
- Do you have a complete and integrated set of performance measures for each significant area of your business?
- Can you and all managers access these at any time?
- Are your professional staff applying their considerable skills to real business issues rather than wasting time and energy on spreadsheets?

What does this mean?

Knowledge, understanding and control will give you:

- More valuable deployment of professional skills.
- Reduction in resources and time devoted to budgeting, forecasting and reporting cycles.
- Focus on corporate objectives and performance targets.
- Faster responsiveness and greater flexibility in the face of rapid economic change.
- Rapid recognition and exploitation of emerging opportunities.
- More robust decisions based on comprehensive, integrated and forward-looking information.
- Better and more informed risk management.

Discovery

We will work with you to identify gaps between your current capabilities and best practices across a number of topic areas.

These include:

- Performance measurement (objectives, KPI's, drivers, targets, etc)
- Planning, budgeting and forecasting
- Management and financial reporting
- Business, market and risk analysis

Based on thorough analysis of these best practice opportunities, we will develop a plan to bridge the gaps to help you seize opportunities, boost performance and reduce risk.

Delivery

Our report will not only cover our findings but will show you how to provide a vastly improved framework and capability for reducing risk and boosting performance.

We will deliver findings in both a face to face presentation and a written report.

Implementation

We can also provide expert implementation support!

Let's get started

Take the opportunity now to talk with **The BMA Group** about how Enterprise Foresight! can make the difference to your business.
